No-Frost Worktop Freezers & Chillers

304 Food Grade Stainless Steel Cabinet

Worktop Refrigerators are designed to take care of the two biggest problem faced by busy commercial kitchens. Lack of Storage Space & Lack of Work Space. Worktops are basically refrigerated storage units which double up as an extra work table for your kitchen on a space which would have otherwise gone to waste.

Front Breathing Condenser Design ensures the machine can be installed just about anywhere in any kitchen layout. Freezing or Chilling process is quick due to cyclonic circulation of very cold and dry air. Temperature controller with LED display, Energy efficient compressors, automatic condensate disposal (no plumbing needed), LED lighting, self closing and lockable Solid Doors, stainless steel shelves, castor wheels with brakes etc.. are few of the many great standard features across all models. These machines are built to work efficiently and effortlessly, minimizing equipment downtime while letting you concentrate on your core business.

These units are available with a wide range of customization to suit your needs. These can range from refrigerated Misé En Place Counters, Ambient / Heated Pickup Shelves (Quartz Heaters), Back / Side Splash, Pullout Drawers instead of swing doors, double / triple pane glass doors etc.. based on your needs.

SPECIFICATIONS FOR COMMERCIAL UNDER COUNTER REFRIGERATORS

REGULAR MODELS	VOLUME IN LITERS	650ml BEER BOTTLES - Nos	CONNECTED LOAD IN WATTS	CURRENT	REFRIGERANT	VOLTAGE STABILISER CAPACITY - KVA	OVERALL DIMENSION IN cms WDH	DOORS	SHELF
WT 500 SS	482	252	550	5.9	134a	2 KVA	180x70x90	3	3
WT 350 SS	320	160	475	2.7	134a	1 KVA	132x70x90	2	2

no frost Back Bar Chiller at 2° to 7°C.

Back Bar Chillers are a great addition to your Bar Counter. They easily fit under your counter while offering maximum user convenience and storage space for your drinks. These units come with front breathing condenser design which makes sure the machine can be fitted in just about any layout without affecting air flow path to the condenser for cooling. These units can be custom made and are also available without the condenser panel visible from the front of the unit.

SPECIFICATIONS FOR COMMERCIAL BACK BAR REFRIGERATORS
